WET ROOM TRAY FORMERS

Independently tested to demonstrate that our unique patent applied structure can withstand in excess of 1 ton of applied weight without notable deflection. Whilst being incredibly strong, our formers have also remained light-weight. As an example, our 900mm x 900mm former weighs only 11.5kg. This level of performance is unmatched by any other floor former on the market.

FLEXI-SEAL

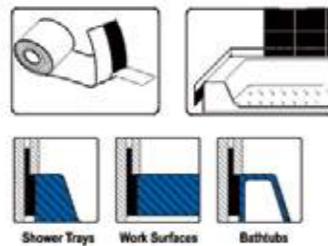

Use Flexi-Seal to protect floors and ceilings from expensive water damage caused by leaks from shower trays, baths and work surfaces.

Flexi-Seal uses a combination of a durable flexible rubber with a waterproof butyl based adhesive to give maximum protection between the application surface and tiles or panels.

Since the rubber is flexible, it will maintain a watertight seal whilst allowing for a certain amount of movement that is inevitable, particularly with new builds.

Available in 2m, 3m, 4m, 10m & 20m rolls.
